

Step-by-Step Processes To Create Amazon Simple Notification Service

1. Create Topic

Step 1: Go to the Amazon SNS dashboard. Click on Create Topic button.

2. Give Display Name

Step 2: Type in the name of the topic and description(optional)

A screenshot of the 'Create topic' form in the Amazon SNS console. The breadcrumb trail is 'Amazon SNS > Topics > Create topic'. The form has a 'Details' section with two input fields. The first field is 'Name' with the value 'gfgtopic' and a note: 'Maximum 256 characters. Can include alphanumeric characters, hyphens (-) and underscores (_).' The second field is 'Display name - optional' with the value 'GFG' and a note: 'To use this topic with SMS subscriptions, enter a display name. Only the first 10 characters are displayed in an SMS message. Info'. Below this note is another note: 'Maximum 100 characters, including hyphens (-) and underscores (_).'.

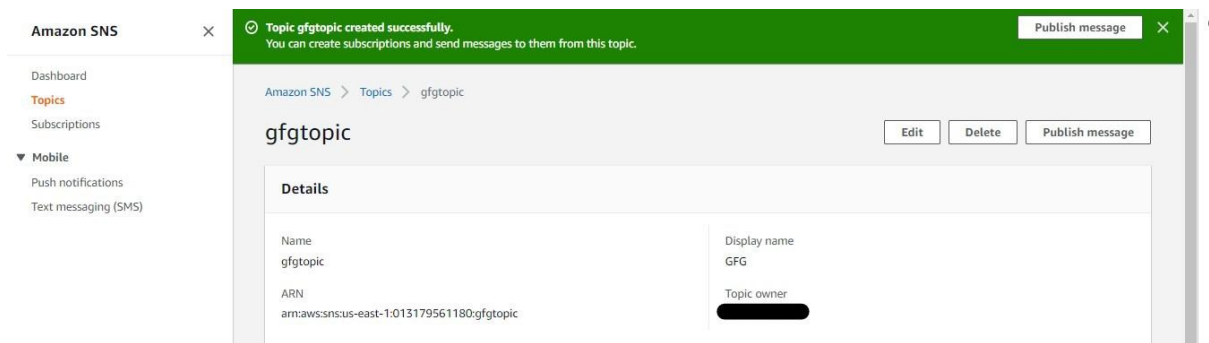

3.Create Key And Value(Optional)

Step 3: Type in the key value of the tag which is completely optional. Click on create the topic.

A screenshot of the 'Tags - optional' section in the Amazon SNS console. It includes a description: 'A tag is a metadata label that you can assign to an Amazon SNS topic. Each tag consists of a key and an optional value. You can use tags to search and filter your topics and track your costs. Learn more'. Below this are two input fields: 'Key' with placeholder 'Enter key' and 'Value - optional' with placeholder 'Enter value'. There is a 'Remove tag' button. At the bottom left is an 'Add tag' button. At the bottom right are 'Cancel' and 'Create topic' buttons.

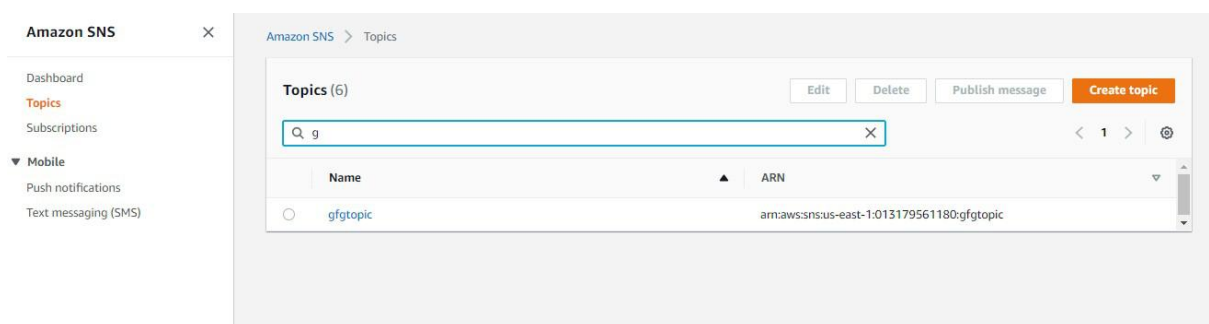

4.Topic Created Successfully

Step 4: Congratulations!! The topic is created successfully.

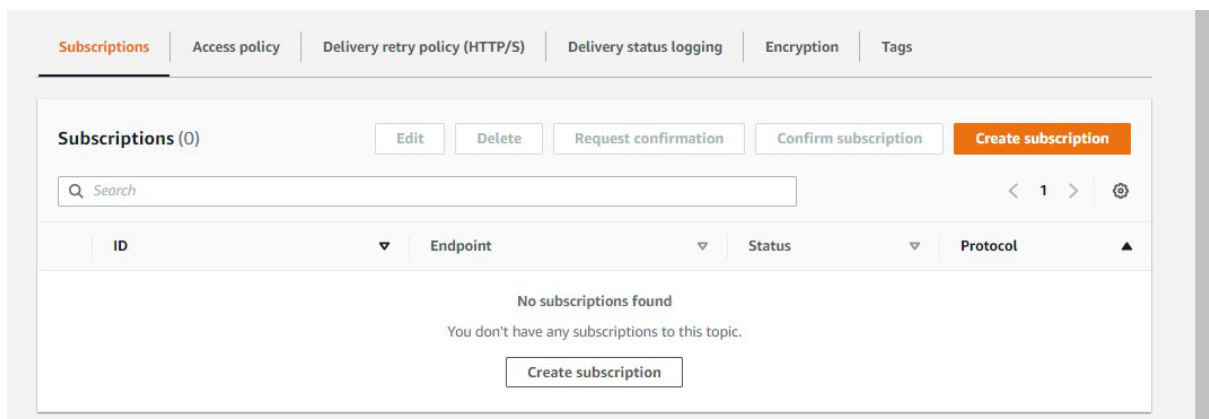

5. Topic Linking

Step 5: Go back to the SNS dashboard. The created topic is visible in the dashboard now. Click on the link to the topic.

6. Create subscription

Step 6: You will be redirected to this page. Under subscription options, Click on Create subscription.

7. Configure Subscription

Step 7: Select the Protocol of the topic as Email and the endpoint of the topic as your email id. Click on Create Subscription.
